DETAILED ACTION

1. This communication is in response to Applicant's request for continued examination filed on October 12, 2005. Amendments to the specification and claims 14-20 and cancellation of claims 1-13, 21 and 22 have been entered. Objections to the specification and rejections made under 35 USC 112, first paragraph have been withdrawn in view of the amendments. Claims 14-20 are pending in this application.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

3. The prior art of record (Kealhofer US Patent 6,078,903 in view of Pitsianis et al US Pub. No. 2003/0088601 A1) teaches a computer based system for computing probability distribution of loan losses in a financing organization having a plurality of loan customers, including a scenario acquiring means for acquiring loan amounts of each loan customer and acquiring a plurality of bankruptcy probabilities of each said loan customer by predicting future fluctuations, and then using these values as a plurality of scenarios, a probability distribution calculating means for calculating probability distributions for each said scenario by Fourier transform inversion of a characteristic function calculated by a characteristic function calculating means, and a probability distribution output means for outputting said probability distribution calculated by said probability distribution calculating means.

Even though, the prior art of record teaches a system for performing the above mentioned steps, the prior art of record fails to teach a computer based system for computing probability distribution of loan losses in a financing organization having a plurality of loan customers including the step of a characteristic function calculating means for calculating characteristic

Art Unit: 3624

functions for each said scenario on the basis of said loan amounts and said bankruptcy probabilities acquired by a scenario acquiring means as specified in specification pages 10-20 to explain what the characteristic functions are and the different scenarios. For these reasons claims 14-16 are deemed to be allowable over the prior art of record, and claims 17-20 are allowed by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(a) Culhane (US Patent 6,513,018 B1) (June 28, 2003) Method and apparatus for scoring the likelihood of a desired performance result

(b) Basch et al (US Patent 6,119,103) September 12, 2000) Financial risk prediction systems and methods therefor

(c) Honarvar et al (US Patent 6,546,545 B1) (April 8, 2003) Versioning in a rules based decision management system
